

Wheelchair Accessible M1 Jany Minibus Seating Solutions

Our Jany brand offers a wide range of solutions of M1 approved seats for Wheelchair Accessible Vehicles designed to be installed into the vehicle with maximum space, but minimising the loss of seats.

Our popular tip and fold Jany M1 862 seat is normally found in frontline NHS Ambulances and is an ideal seat due to its ability to fold flat, extremely robust and can be mounted on our space saving pyramid leg or wheelarch box.

We can also offer a wide range of wheelchair tie down restraints designed to fit into our flooring system which are fully WTORS tested to the latest approvals.

All our seating systems are fully approved for the latest Type Approval legislation for a wide range of popular vehicles and we supply a full build certificate for each vehicle we do, which assists end users when applying for a taxi plate licence with their local authority.

We openly publish all our test reports to be viewed on line and we test all our seats in each individual manufacturers vehicle model shell you can view our test reports here:
